

# Safira Nabila Putri

Associate Software Engineer

Bengkulu, Indonesia — +62 813 6626 2807 — safiranaaa@gmail.com

Portfolio — LinkedIn — GitHub

## SUMMARY

Dynamic Software Engineer and Computer Science graduate (GPA 3.84) with specialized expertise in software solutions engineering, machine learning pipelines, and algorithmic logic implementation. Proven track record in developing complex end-to-end systems and utilizing rule-based reasoning and data mining to drive intelligent automation.

## EDUCATION

**Universitas 'Aisyiyah Yogyakarta** (*Bachelor of Computer Science, GPA 3.84*) Yogyakarta, Indonesia  
*Relevant Coursework: Data Structures & Algorithms, Software Engineering, OOP* *Graduated: Oct 2025*

## EXPERIENCE

**IT Developer Intern - UI/UX Designer, Mitra Paramedika Hospital** Oct 2025 – April 2026

- Designed comprehensive user interfaces for the Electronic Medical Record (EMR) system.
- Developed high-fidelity interactive Figma prototypes using advanced logic variables to streamline clinical data entry.
- Collaborated with multidisciplinary teams to translate complex medical workflows into intuitive digital solutions.

**Research Assistant, Universitas 'Aisyiyah Yogyakarta** July 2025 – Oct 2025

- Spearheaded data mining initiatives using K-Nearest Neighbors (KNN) algorithms to derive actionable insights from academic datasets.
- Authored technical literature reviews for peer-reviewed journals, maintaining high standards of academic rigor.

**Web Administrator Intern, SEAMEO RECFON** Feb 2024 – June 2024

- Designed and built an official internship microsite using Laravel, deploying backend functionality and configuring local database structures.
- Administered organizational web platforms to ensure continuous site uptime, seamless functionality, and end-user accessibility.
- Drafted technical proposals for server infrastructure upgrades, evaluating system scalability and resource performance constraints.

**International Mobility Student, Universiti Teknologi Mara (UiTM)** Oct 2023 – Feb 2024

- Represented home university in a selective International Credit Transfer program in Computer Science (Hons) in Malaysia.
- Mastered advanced technical subjects while developing cross-cultural communication and global problem-solving skills.

## PROJECTS

**GuardCare: Child Nutritional Status Diagnostics** (*Kotlin, RBR, SQLite*)

- Built a mobile diagnostic tool utilizing Rule-Based Reasoning (Forward Chaining) to drive intelligent reasoning workflows for identifying childhood nutritional risks.
- Managed the complete development lifecycle, transforming complex clinical diagnostic rules into responsive, production-quality software workflows.

**Mental Health Problem Estimation** (*Python, Streamlit, Scikit-Learn*)

- Developed a web platform estimating risks for stress and postpartum depression using SVM, KNN, and Decision Tree algorithms.
- Deployed the machine learning model to Streamlit Community Cloud for public accessibility.

## SKILLS

**Programming:** C, Python, Kotlin (Jetpack Compose), Java, PHP (Laravel)

**Machine Learning & AI:** KNN, SVM, Decision Trees, Scikit-Learn, TensorFlow Lite, Generative AI concepts (LLM Workflows, AI Agent Logic Architecture)

**Infrastructure & Systems:** Server Infrastructure, Database Management (SQLite, MySQL)

**Tools & Cloud:** Android Studio, Figma (Advanced Logic/Variables), Firebase, Streamlit, Git/GitHub, Jupyter Notebook

## CERTIFICATIONS & ACHIEVEMENTS

**IT Helpdesk Technician** — BNSP (Badan Nasional Sertifikasi Profesi) 2025

**Alibaba Cloud Certified Developer** — Alibaba Cloud 2024

**English Proficiency** — Duolingo English Test (Score: 110+) 2023

**Bronze Medal** — Scientific Paper Competition - APTIKOM PTMA 2022

## LEADERSHIP

**General Director of Data Centers** — Student Executive Board (BEM) Feb 2024 – Feb 2025

- Managed organizational data infrastructure and led a project team of 20+ member committee.
